

Rain Barrels: *a smart approach to clean, free water*

What are Some Advantages of a Rain Barrel?

Lawn and garden watering make up nearly 40% of total household water use during the summer. A rain barrel collects water and stores it for when you need it most - during periods of drought. It provides an ample supply of free "soft water" to homeowners and contains no chlorine, lime, or calcium. This makes it ideal for watering gardens, flowerpots, and car and window washing. A rain barrel can save most homeowners about 1,300 gallons of water during peak summer months. Saving water not only helps protect the environment, it saves you money and energy. Diverting water from storm drains also decreases the impact of runoff to streams and rivers. Therefore, a rain barrel is an easy way for you to help protect our natural resources and have a supply of clean, fresh water for outdoor use, for FREE! Consider purchasing your rain barrel from the Monroe Conservation District where all your purchases are appreciated and support our conservation efforts. For more information about these products go to www.upcycle-products.com or call the Monroe Conservation District at (734)241-8540 ext. 5.

Made from recycled food-grade barrels that have been thoroughly cleaned, and then assembled in the USA.
The pedestal risers are made from recycled cedar wood.

PRICES tax included:

Rain barrels \$79.50

Wooded pedestal riser to raise rain barrel 12" off the ground \$26.50

Collect and store rainwater from rooftops for later use.

- ✚ 55 capacity, shapes may vary
- ✚ Colors: black, gray, green, terra-cotta
Includes aluminum screening on top to keep out leaves, debris and insects
- ✚ Includes front hose shutoff; side fitting to connect multiple barrels; & overflow fitting & cap
- ✚ 5-year warranty on materials and workmanship
- ✚ Saves you money and energy during peak summer months with decreased demand for treated water
- ✚ Reduces storm water runoff and pollutants that are carried to drains, streams and rivers
